St. Patricks Win by Lucky Goal
Eskimos Had Them Backed Into Own Nets in Last Period**SPORT****ESKIMOS LOSE BUT PUT UP GREAT BATTLE**

Goal Keeping Of Roach Saves St. Patricks From a Bad Beating

DURING FINAL PERIOD ESKS RAINED SHOTS ON CHAMPIONS' NETS BUT FAILED TO SCORE

Shot by Randall in Second Period Won the Game—Winkler Led It into Net—Eskos Had Most of Play But Looked Aroused in Front of Nets—Missed Several Open Goals

WINNIPEG, Nov. 28.—The world champion St. Patricks of Toronto were victorious in the first game of their Western tour here tonight, defeating the Eskimos two to one. All the goals were scored in the second period.

The win was rather a lucky one, as a soft shot from Randall's stick which Winkler pulled into the Edmonton net when it was a foot outside the post decided the conflict in favor of the St. Pats. But it was the greatest exhibition of hockey staged on Winnipeg ice for many a year and abounded with thrills from going to going. The terrific pace that the players set made it look more like a championship contest than any exhibition affair.

Toronto won because they showed more finish than their more experienced opponents, who carried the play into the second period, but the greater part of the time, but a goal here and there, was given to the Eskimos by Roach, the little star of the team, who was the chief after attack when the Eskimos worked hard for the first period.

Goals kept the performance even at the start. The Eskimos got up early all the way, with the dasch, but the St. Pats had the better of the defensive work and the sensible play of the western boys to hold them in check. In the last period it was very thrilling.

Goals All Scored in Second Period

The Eskimos were coping in the opening period, which was exceptionally fast and strenuous in which the centre took the lead. The Eskimos were nine out of the 20 minutes, but the Eskimos could not take advantage of the extra man. The St. Pats, however, continued the scoring 4 seconds after the second goal, when Winkler, after a shot from outside of the defence, which caught Winkler napping, took the ball, passed it to the centre, tied it up shortly after, and rushed it into the Eskimo's own range. The winner came about four minutes when Randall skated down center and sent the puck to the line, and Winkler shot from the blue line and Winkler pulled the rubber into the net.

The boys roughed things up a little, and the Eskimos had a number of occasions in swining his stick. Both teams were good in the end of the game. Both teams excelled in speed and strong defensive tactics, but the St. Pats were faster. Simpson was the feature of the Eskimos, but he was held in check and Randell did the heavy work for the Eskimos.

Montreal Will Try to Sign Conacher; Want Ruby Star for Team

MONTREAL, Nov. 28.—Les Dandurand, managing director of the Canadian hockey team, has telegraphed to the manager of the Hotel Royal York in a hurry for Toronto's morning hot line on the trail of the Ruby Star, the star of the Argonauts' crack team and at present a member of the Aces. Les wants him.

The Canadians' manager apparently wants the amateur star body for body.

Dandurand stated that he had made up his mind to sign him, for he has never had to try so.

Can Guide Airships
Across Sahara By
Underground Cable

Paris, Nov. 28.—By means of a buried cable, which will run from Cairo to cross the Sahara Desert safely, the academy of sciences was told today by Adolphe Pichot, director of the canal, that when the current flowing through the cabin influences the pilot of an airship or plane or ship so that the pilot is able to tell his exact position at a glance. The invention was developed by a team sent by army and navy officials. Admiral Georges Lohr said: "It is the work of Engineers Loth."

Cork City Council
Will Name Senators
In Spite of Threat

Cork, Nov. 28.—By a vote of 20 to 6, the Cork corporation decided to day to make nominations to the Irish Senate created by the Free State administration. President Eamon de Valera, signed by the officer commanding Cork, said: "The nomination of the army" was read by the town clerk.

"Owing to the murderous and illegal assassinations of our men in Dublin at Kilmainham Jail, Dublin, whose only crime was that they stood up for the complete independence of Ireland," the latter said, "you are hereby warned that the Cork Corporation will not participate in nominations to the Senate, unless it succeeds in acquiring in these murderous executions and those responsible will be dealt with accordingly."

London Holders Of
National Rly Bonds
Have Unlikely Rumor

London, Nov. 28.—(Canadian Press Cable).—Considerable interest was shown in a statement widely published in the British press yesterday that a large holder of Canadian Northern railway bonds had been compelled to declare itself insolvent in May, 1920, at 100, had been unable to assure the public there was no doubt whether the Canadian government would so redeem the debt.

Ruptiles, though, are pressing to know who have this unusual because it is the first time since the government of Canada assumed control of the Canadian Northern that any guarantee concerning this particular stock, which has not paid interest for two years, has been given.

But fear that interest will not be paid until the end of next month has caused some anxiety as far as the net earnings are concerned, after the payment of the fixed rate of 5 per cent. to date.

Canadian Northern railway debtors are quoted as saying that they are not sure that the Dominion government will not be compelled to take over hence, at 85 above the present quotation.

Undertake Clean Up
Southern Mining Camps

Spokane, Wash., Nov. 28.—Marching in military formation between places visited, a group of white-robed marchers estimated at 250 visited several small mining camps in the Coeur d'Alene country oil field section Sunday night and with propulsive and habitual gait cleared the debris of debris to deposit.

After the visit there was a general exodus of negroes according to word from Sheriff Ed Harmer at Coeur d'Alene. The negroes, who came from the Smackover oil field section were "doctored with fleas" before the marchers who were armed and marched in single file through the camp grounds and some of the smaller camps were visited.

The march came after the shooting of Cotton Persons, 32, a driller, by a negro.

Monday Forenoon Holiday

The weekly half holiday is a desirable feature of industrial life. It has become in measure a fixed institution. Saturday afternoon is the half holiday generally agreed upon, so far as urban industrial and clerical employment is concerned. The classes of employment comprising the greater number of urban employees; but not all. A very important part of the working force of any city are the sales clerks. Their chief desire is the facility of fitting their right to a weekly half holiday into the scheme of things in this commercial city is claiming a large share of public attention at the present time.

Modern society is a complex organization. It is maintained by the interchange of useful service. Each member has to take a certain part, in order that there may be progress and growth. As the services rendered by each section of the community varies in kind and character as it varies in time and circumstance. It is not possible that all shall work all day and rest the next. It is not possible to lay in one apart as a day of rest. But cooks must work on Sunday or people could not eat. Trainmen must work on Sunday or the railroads could not run. And the benefit of the public in the case of the weekly half holiday, while Saturday afternoon suits the majority, if the minority also demand it, it loses a large part of its value to the public.

A matter of argument then is no reason why the sales clerk should not have a Saturday half holiday, as well as the desk clerk or the artisan. But as a matter of fact if the sales clerk or the artisan on Saturday afternoon, the majority demand it, it loses a large part of its value to the public. A matter of argument then is no reason why the sales clerk should not have a Saturday half holiday, as well as the desk clerk or the artisan. But as a matter of fact if the sales clerk or the artisan on Saturday afternoon, the majority demand it, it loses a large part of its value to the public.

At the same time it must be acknowledged that the sales clerk is not as a matter of personal right to a weekly half holiday the same as any other employee. If conditions or circumstances make it difficult to give the half holiday on Saturday afternoon. Then the attorney-general should assume authority and grant the company a 35 cent rate without reference to the burgeses of the city as provided by the charter. The city council can permit themselves to that course and the utilities board pass the order granting the company the new rate. The then attorney-general issues the ground rules the utilities board had the authority to alter the contract made between the city and the company. His view was upheld by the courts and the deal was off for the time being.

In the last regular session of the legislature an amendment was passed that empowered the utilities board to alter the contract rates subject to the assets of the city council. Thus the city council gave its assent, and the 46.12 cent rate has been fixed.

It was a leading provision of the city charter, and as far as a couple of citizens are concerned, that a rate made with the asset of the burgeses could only be amended by their consent. But neither charter provision nor principles of justice seem to figure in the young lives of our politicians or city councillors when gas company interests are in question.

giving them the same length of week-end holiday as other workers in the city. And, as far as possible, and at the same time avoiding a break into the business week?

Unless the sales clerk works on Saturday afternoon that holiday is not much to his fellow workers.

On Monday forenoon his services are in least demand. If retail stores did not open until Monday afternoon there would be less disarrangement of the city than if they were closed on Saturday half-day of the week. People city purchasing on Saturday could easily stock up sufficiently to last until past noon on Monday. While about most retail stores in the city about noon and farmers going in do not arrive until about 1 P.M.

A Monday forenoon holiday

would interfere much less with retail trade than either a Saturday half day or a Sunday.

While it would not be desirable from the employee's point of view as the Saturday afternoon holding is becoming a continuation of the Sunday rest it would be much more reasonable to add a minimum noon which represents a maximum of disadvantage to trade with a minimum of advantage to employees.

The Price of Gas.

The price of gas to Edmonton citizens is to be 46.12¢ per thousand cubic feet. With all due deference to the utility board, this is not fair price to be either charged or collected. The original contract submitted to the city with which Calgary paid a 45 cent rate; and much less on the original contract made with the gas company. A price of 46.12¢ precludes the possibility of saving industrial purposes or for household heating in winter. It therefore removes it from useful competition with coal. The price fixed limits the use of gas for cooking and especially for heating purposes. Considering the imminent hyper-disease of oil who stomach full of 4¢ per cent of "boilermaker's beer"?

Heating for food purposes, in summarizing the discussion by quotation from Timothy, to "Take a little wine for thy stomach's sake, because it helpeth them that are grieved." He then answers his own question by saying "I will give you a word of the wine." Mr. Poole writes you're right. The Newest Petition. May not be good for observing in Mr. Poole's letter. The original memorandum hyper-disease of oil who stomach full of 4¢ per cent of "boilermaker's beer"?

Fortunately for men of talent they have the right to express their views. What happens afterward counts.

The world is what they can accomplish by effort, and they have every incentive to put forth the effort.

But they are often outstripped by the world's greed and ambition.

Opportunity is still equal in the world to those who have the ability to seize opportunity that is unequal.

But opportunity can be made up to some extent by willingness to work and to toil.

We are on the eve of selecting and electing a city council for the year. The city is satisfied with the administration of the utilities board and goes on with the project it will need a mayor and council in office that will give the company the best of it in any event in which it arises of the city and of the company conflict.

The mayor and the majority of the councillors now standing for re-election have rendered good service to the city and the utilities board. One Monday forenoon his services are in least demand. If retail stores did not open until Monday afternoon there would be less disarrangement of the city than if they were closed on Saturday half-day of the week. People city purchasing on Saturday could easily stock up sufficiently to last until past noon on Monday. After This Start.

Plant two rods from the same pair.

Permit one of them to grow with only the assistance of nature.

One will grow haphazard, and never know what the other does.

One will grow straight.

One will grow tall, and the other short.

One will grow up into an idle and disappointed man.

He must be independent, and he must do things for himself, and as he grows he will be independent.

He must be strong, and he must be distinguished.

He will be emboldened,

and he will not know who he is.
